TABLE OF CONTENTS

About Waste Business Journal..... 1

About James Thompson, Jr. 1

1 HISTORY & BACKGROUND..... 2

1.1 Recent Events..... 2

Continuing Industry Consolidation 2

Fewer landfills make them more valuable and vulnerable at the same time 2

Trouble for SPSA..... 3

Supreme Court rules on flow control with implications for municipalities 3

1.2 Economic Outlook 4

1.3 History 5

Highly fragmented, low technology, and low cost..... 5

Changes in regulations 5

Waste disposal crisis of the late 80’s 6

Economic and political incentive to increase recycling 7

Incentive to shop for lower disposal fees 7

Barriers to mobility: Flow control, Import bans and other legislative obstacles 7

Waste is increasingly hauled further away from the source of its generation 8

Effect of regulation on industry participants 8

Overbuilding and excess disposal capacity 8

Rising role of the private sector 8

Rising materials recovery rates 9

Problem of demand and capacity for recovered materials 9

Reengineering manufacturing to take advantage of recovered materials 9

Maturing market for recovered materials..... 10

TABLE OF CONTENTS

2 SOLID WASTE MANAGEMENT 11

2.1 Industry Overview: Size and Segments 11

Defining the Market 11

Key Segments 12

Key Players 14

Supremacy of the publicly traded companies 16

Pricing Discipline 17

Rising Fuel, Equipment, Insurance and Labor costs may provide incentive to hold pricing 17

Waste by Rail 18

Personnel 18

M&A Activity 19

Vertical Integration through roll ups and “tuck-ins” 20

Efficiency through Technology and Route Optimization 21

Full Service Approach 21

Repackaging themselves as Green Companies 22

2.2 Industry Overview: Total Generation, Recovery & Disposal..... 23

Municipal Solid Waste Generation and Disposal Trends 23

Industry Consolidation 24

Growing Network of Transfer Stations 25

Solid Waste Management Segments 26

2.3 Collection Markets 27

Waste Collection 27

2.4 Processing Markets 28

Transfer and Processing 28

Helped by higher pricing 29

Diversion and Product Stewardship 30

Take Back Programs 31

2.5 Disposal Markets 33

Disposal Segment 33

C&D Down 35

TABLE OF CONTENTS

2.6 New Disposal Technology 36

 2.6.1 Bioreactors..... 36

2.7 Landfill Development and Operating Costs..... 38

 Development Costs 40

 Construction Costs 40

 Closure and Post Closure Costs 40

 Annual Operating Expenses..... 40

 Other Economies-of-scale..... 41

 Resource Recovery 41

2.8 Incinerator Operating Costs..... 43

2.9 Waste Management Market Dynamics and Geographic Distribution 46

2.10 Movement of Waste and Attempts to Control its Destiny 51

 2.10.1 Flow Control..... 51

 2.10.2 Waste by Rail..... 54

 2.10.3 Interstate Waste Movement 55

2.11 Processing and Disposal Volume by Region..... 59

TABLE OF CONTENTS

3 COMPETITION IN SOLID WASTE MANAGEMENT 67

3.1 **Top Solid Waste Management Companies..... 77**
Leading Waste Management Firms 77

3.2 **Leading Firms in Waste to Energy 80**
Largest Waste-to-Energy Companies Ranked by Total Capacity..... 80

3.3 **Industry Mergers and Acquisitions 84**

3.4 **Municipal Solid Waste Authorities 86**

4 LANDFILL CAPACITY..... 87

5 PRICING 96

TABLE OF CONTENTS

6 MATERIALS RECOVERY 105

6.1 Market Review..... 106

6.2 Resource Recovery Market 110

Public Still Highly Supportive of Recycling..... 110

Recycling Rates Higher in Line With Population Density and Disposal Costs 111

Energy Savings from Recycling 111

Slight Decline in Curbside Recycling Programs..... 112

Bolstered by Composting..... 113

Economic Justification of Recycling 114

Economies-of-scale for Large Recycling Companies..... 114

Record High Commodity Pricing 114

Market Stability from Increasing Global Demand..... 115

Market Volatility and Vulnerability to Global Pressures..... 115

Rising Cost of Transportation..... 116

Evolving to Buyers Market (Mills) from Suppliers Market..... 117

Declining Supply of Old Newsprint..... 117

Large Corporations are Deploying Sustainability Measures..... 117

State Legislatures Push More Recycling Measures Including Landfill Bans 117

Single-stream Recycling to Address Recycling Goals and Higher Transportation Costs..... 118

Still Room to Grow..... 118

Behavioral Challenge..... 118

The EU as a model..... 119

Development of Secondary Markets Supports the Business..... 119

6.3 Paper Recycling 120

6.4 Plastic Recycling..... 122

6.5 Aluminum Recycling..... 124

6.6 Steel Recycling..... 126

6.7 Glass Recycling..... 128

6.8 Largest Recycling Companies 129

TABLE OF CONTENTS

7	OTHER SOLID WASTE MANAGEMENT SEGMENTS: SPECIAL AND INDUSTRIAL WASTES	136
7.1	Scrap Tire Recycling	136
7.2	Construction & Demolition Debris Disposal and Recycling	138
	Some Definitions:	139
	Relevant Regulations	140
	Components of Construction and Demolition Debris Wastes	140
	C&D Pricing follows a similar pattern to that of MSW	147
	MSW Pricing Historically Reflects Ratio of Demand for Disposal to Available Capacity (Supply)	148
	Available Disposal (Supply) is Represented by Proximity to Landfills and Waste-to-Energy Plants	149
7.3	Food Wastes	155
	Definition	155
	Food Waste Recycling	155
	Unique Challenges	161
	States are Looking to Food Waste as Next Great Opportunity to Meet Recycling Goals	161
7.4	Yard Waste and Composting	165
	Source Separation of Organics Advances Slowly	167
	Divert, Don't Dump	169
	Anaerobic Digestion Emerging	171
	Compostable Organics out of Landfills by 2012; COOL 2012	176
7.5	Wood Wastes	179

About Waste Business Journal

Waste Business Journal publishes newsletters, directories and reports, and performs customized research for the waste management industry. WBJ has served this industry for over seventeen years, during which time, the company has accumulated through direct survey and other means a great deal of historical and current industry economic data. Using its proprietary database of waste disposal facilities and companies, WBJ staff regularly analyze waste disposal trends including volumes, prices, and capacity and publishes these findings in a number of its regular reports (available in print and on-line). Waste Business Journal and its president, James Thompson are recognized nationally as leading authorities of the waste industry. The company consults to a variety of clients on issues of strategic, economic, regulatory, and policy issues related to waste management. The Company is located in San Diego CA and considers itself an industry consultant and member of the professional information publishing business.

About James Thompson, Jr.

James Thompson is President of Waste Business Journal, a research and consulting firm dedicated to the waste management industry. With over fifteen years of experience in the industry, he is a leading expert on waste issues, pricing and business trends in the US. In 1991, he founded Chartwell Information and created Solid Waste Digest, the industry's first and only true quantitative business newsletter. That required his development of the industry's most comprehensive database of pricing, volume and supply statistics.

Mr. Thompson regularly consults with clients on issues of strategic, economic, regulatory, and policy issues related to waste management. His clients include corporations, governments, and agencies of the federal government. He has consulted to every major solid waste firm in the U.S. Consequently, his views have been presented in the Wall Street Journal, the New York Times, the Economist and National Public Radio among many other media.

James Thompson is a graduate of Yale University and holds an MBA from Vanderbilt University.
